

給小領袖的信 (四十六) :

您好！上周我來信說：「怒要緊閉咀，免增怒。」本周富蘭克林的名句是：「沒有動物比螞蟻更勤奮，然而它卻最沉默寡言。」

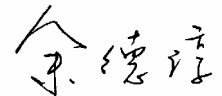

兩周的名言都是教我們少出聲，分別不要怒和要勤奮做事。

做功課和溫書都是靠集中注意力，我們若不傾談便可維持思想的完整，勁力也不作無謂消耗。

勤力的人與任何人的體質沒有分別，只是在安靜做事中顯出超卓。

祝 勤奮沉靜！

Hello! I mentioned in last week's letter that we should "shut our mouths when we are angry, and don't get angrier". This week we are going to study Benjamin Franklin's famous quote, "No animals are as diligent as ants, ants also are the most reticent."

These 2 weeks' quotes are both reminding us not to talk too much, they tell us to control our temper and be diligent respectively.

Studying and doing homework both require us to focus on our work quietly. We can think concretely and save much effort to study if we stop talking with others.

20th October, 2008.

給小領袖的信 (四十八) :

您好！蕭伯納說：「我不是教師，是個尋路的同行者。」

每一個兒童都需要為將來預備理想的出路，也在同時遇上不少同行者。

多元智能是所有路線的名稱，計有表達力、創意、動感、推理能力、音樂感、交際能力和反省力。

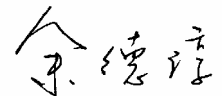

如果由兩歲半起就給孩童有上述的基礎訓練，幾年後就可成為一個可在任何環境對所有發生事物和與每一個遇上的人發揮良好的影響力。

我們的活動就是綜合了腦部、身體反應動作和與人相處的鍛鍊。

如您在參加活動中發現了超卓的優點，您只需做一件事，就是「虛心學習」！

祝 擁有多元智能！

Hello! George Bernard Shaw said, "I am not a teacher, but a man who's walking with you and finding my ways."

Every child has to prepare for his own future, and many people will be walking with him.

Multiple intelligence is a term for all the possible futures. It includes seven core intelligences: linguistic, creativity, bodily kinesthetic, logical-mathematical, musical, interpersonal and intrapersonal.

If a child is given these basic trainings since he's two and a half years old, he can adapt strongly to any given environment, and he can also make a good influence on every person he encounters within a few years.

Our activity is a combination of our brain, body reflexes and the training of communication with other people.

There's only one thing you need to do when you find someone who is extraordinarily intelligent -learn sincerely from these people.

Wish you had multiple intelligence!

3rd November, 2008.
